

COURSE ABSTRACT

Cúram Action View Functional Overview

CUR117

Course Description

This course introduces the learner to the following topics:

- Cúram Action View is a person-centric workspace that helps caseworkers to perform the following tasks more efficiently:
 - Understand a client's current situation, identify what needs attention, and complete common actions more efficiently.
 - The main Action View features that caseworkers use.
 - How these components expedite day-to-day work in social services organizations.

The course introduces the main features and functionality of Action View. It also explains how Action View integrates with the key business processes of social services organizations, enabling caseworkers to work more effectively.

General Information

Delivery Method: Instructor-Led or Self-Paced.

Audience: This course is primarily intended for Business Analysts, Business Architects, and QA Team members. It is also suitable for technical roles, such as Technical Architects and Developers. In general, the course is suitable for anyone who needs to know about Action View and understand what it does.

Topics: The course covers the following topics:

- Why social services organizations need the functionality that Cúram Action View provides and the benefits it provides to caseworkers.
- How Action View can address caseworker challenges by enabling the following functions:
 - Consolidating important information.
 - Surfacing items that need attention.
 - Providing links to related records.
 - Supporting common actions in context

- How Action View is structured into six cards and the respective purpose and functional features of each card.
- How the See More, Do More, Faster mantra explains what Action View is designed to do. The aim of Action View is to help the caseworker to see more relevant information, do more work based on that information, and complete the identified work faster.

Learning Objectives: After completing the course, learners should be able to:

- Describe the purpose and business value of Cúram Action View.
- Identify the main Action View cards and their purpose.
- Explain how Action View helps caseworkers see more, do more, and work faster.

Prerequisites:

The Education Team recommends that learners take the following course before they start their exploration of Action View:

- *CUR088 – Fundamentals of the Merative Cúram Platform for Business Analysts 8.X*

In addition, learners must be familiar with common Cúram caseworker activities and concepts before taking this course. The course assumes that learners are conversant with the following Cúram artifacts and concepts:

- Person Records
- Applications for Benefits or Services
- Integrated Cases
- Product Delivery Cases
- Evidence
- Verifications
- Notes
- Role of Familial Relationships in Cúram
- Payment and Entitlement information

Duration:

2 hours approximately. This is an estimated completion time that consists of the audio duration and extra time for referring to the lesson PDFs. The estimate also reflects the fact that each learner works at a different pace.

Skill Level:

Basic.
