Sources for Frontend Training

If you are coming from a server-side development background, build a basic understanding of JavaScript (ECMAScript 6 and later), HTML, and CSS before starting React training. React and modern JavaScript syntax can take time to absorb, so plan for hands-on practice before attending training. This preparation will help you understand the code samples and complete the course exercises.

The following resources can help you build the prerequisite knowledge for these courses. Most are free, and they provide a mix of books, web text resources, and videos.

Topic	Name	Type	Comments
HTML, CSS, JavaScript	Sams Teach Yourself HTML, CSS, & JavaScript	Book	Great for learning concepts and reference
Frontend Development	Front End Handbook	Web	https://frontendmasters.com/guides
Frontend Development	Frontend developer roadmap	Web	https://roadmap.sh/frontend
Frontend Development	Developer Learning Path	Web	https://www.reactiflux.com/learning Builds knowledge from basics up.
JavaScript	Learning ECMAScript 6+ Learning Functional Programming with ES6+	Video	https://www.linkedin.com/learning Short, well-presented tutorials.
ES6, React, Redux	freeCodeCamp courses	Web	https://www.freecodecamp.org/
ES6, React, Redux	Net Ninja	Video	https://www.thenetninja.co.uk/ Very well explained lessons on YouTube
ES6, React, Redux	Tyler McGinnis	Video	Pricey, but comprehensive. https://react.gg/
React	The Beginners Guide to React, Kent C. Dodds	Video	https://egghead.io/courses/the-beginner-s-guide-to-react
React	React Developer Roadmap	Web	https://github.com/adam-golab/react-developer-roadmap
React	Learning React, O'Reilly	Book	
React and Redux	React – The complete Guide (including Hooks, Router, Redux)	Video	https://www.udemy.com/ Covers essential JavaScript also. Bestseller React course on Udemy.

Coursera and Pluralsight also offer excellent courses about JavaScript and React. New resources are available all the time so best to do a general search.

How long does it take to learn the prerequisites?

© Merative US L.P. 2026

The time required to learn the prerequisites varies by person. If you are new to frontend development and come from a server-side background, use the following estimates as a guide:

- JavaScript, CSS, HTML refresh: 8 – 12 hours
- ES6 and later: 6 hours
- JSX: 2 hours
- React: 24 hours

Am I ready for the Action View Developer course?

You are likely to be ready for the course if you can:

- Read and understand JavaScript code.
- Create a simple React component.
- Understand props and state.
- Understand React Hooks.
- Perform basic debugging.

Tools

While you can use any IDE you like when customizing Action View, the training course uses VS Code. The ESLint and Prettier plugins are used to make it easier to develop React code. The training course also uses the Chrome browser.
